Search Notes

Attached are the search results for the customizable toy figure, including prior art searches in foreign and international patent databases; product, general news, and general sci/tech non-patent literature databases; and the Web via the Google search engine.

I did not find both the hole and the magnet concepts in the same reference, but I found each separately in various references and tagged those I thought most relevant. However, I recommend that you review all of the results.

Also attached is a search feedback form. Completion of the form is voluntary. Your completing this form would help us improve our search services.

I hope the attached information is useful. Please feel free to contact me (phone 305-5934 or email jeanne.horrigan@uspto.gov) if you have any questions or need additional searching on this application.
